

SOMETIMES DIET AND EXERCISE CAN ONLY GET YOU SO FAR. IT MAY BE A STUBBORN METABOLISM, OR PERHAPS HEREDITY FACTORS HAVE PREVIOUSLY PREVENTED YOU FROM HAVING THE BODY YOU ALWAYS DREAMED OF.

NOW THERE'S A WAY TO TARGET THOSE AREAS ON YOUR BODY YOU'D LIKE TO IMPROVE—WITHOUT LIPOSUCTION OR OTHER EXPENSIVE, INVASIVE SURGICAL PROCEDURES. IT'S A NEW BODY SHAPING TREATMENT CALLED *Accent Your Body* FROM ALMA LASERS.

YOUR DOCTOR OFFERS *Accent Your Body*, AND HAS PROVIDED THIS BROCHURE FOR YOU, TO ANSWER SOME COMMON QUESTIONS AND LET YOU KNOW WHAT MIGHT BE POSSIBLE.

*Talk with Your Doctor
about Accent Your Body*

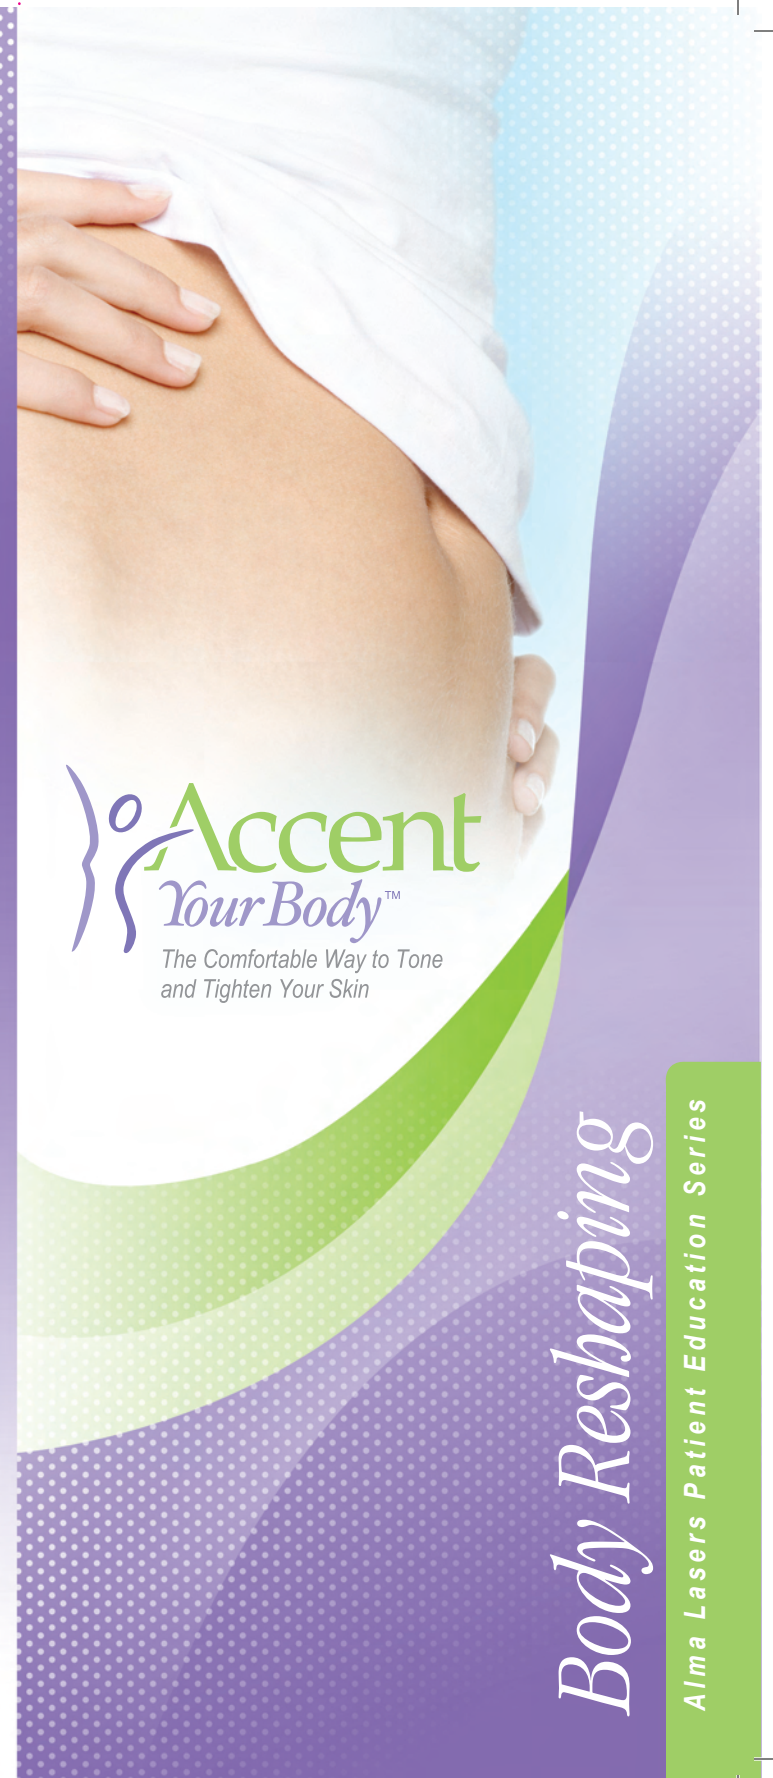

Ask your doctor if the Accent is right for your body reshaping needs, and then schedule an appointment to discuss the areas on your body you'd like to target.

Go online to learn more and imagine what *your* before and after photos might look like, at AccentYourBody.com.

Body Reshaping

Accent Your Body

Accent Your Body™, or Accent™, provides controlled heat therapy to fight wrinkles and reshape any bulges or sagging skin on your body.

The treatment process is entirely comfortable, quick and virtually pain free. You'll go through a series of office visits to see the full benefits.

Since it's not surgery—there are no incisions, stitches or even anesthesia needed—there's no recovery time required. You can go straight back to work or home, with no one the wiser.

Smoother Skin for a Slim, Sculpted Look

Accent helps smooth and contour any loose, wrinkled or dimpled skin *anywhere* on the body. The treatment can help flatten your stomach, slim your hips and thighs, and tone your upper arms. Many patients also consider it after surgery or having a baby.

Accent can also safely and effectively tighten the skin on your face and neck.

Virtually Pain Free

Most people find Accent very comfortable. While pain tolerance is subjective, many patients often describe the sensation as a "warm massage."

Targeted Heat Therapy

Accent uses cutting-edge medical technology, called radio frequency. It uses radio frequency energy to heat the dermis, your skin's inner layer. This targeted energy helps reorganize the cellular environment and stimulates your cells to release toxins, drain retained fluids and produce new collagen.

You'll see increased blood circulation and connective tissue shrinkage from the heat therapy. Both of these actions will improve your skin's contour and texture—which gives you that toned, firm look.

Depending on the size of the treated area, a treatment may take from 15 to 45 minutes.

The Accent Difference: Visible Results

Accent provides visible results, because it is the only treatment of its kind to use a "dual layer" approach. This means it treats tissue at two different depths using both unipolar and bipolar hand pieces. You'll feel your body reshaping because of the dual layer targeting.

Patients often see results right away. Over time and with follow-up procedures, your results will be even more visible as new collagen develops and toxins are removed. Generally, three to five treatments at two week intervals will be required.

Safe and Comfortable

Accent is completely safe, cleared by the FDA, and has been used to improve the lives of thousands of patients worldwide, safely and successfully. The risk of significant side effects is extremely low.
